Quantitative Measurement &  
Alert Software Solution for OGI  
Cameras

**Realtime & Offline Quantification of VOC's**  
Remote quantitative measurement of leak rates  
for most VOC's

**Automated Gas Detection & Alerts:**  
Automated alerts based on raw data of  
OGI footage

**Portable & Fixed**  
Supports both EyeCGas  
portable and 24/7 fixed  
monitoring solutions

## WHY CHOOSE EYECSITE SOFTWARE?

- ✓ Laser Detection Integration
- ✓ Fire Detection
- ✓ Flare Monitoring
- ✓ Real Time Streaming Protocol
- ✓ Man-Down Alert
- ✓ Full Customization
- ✓ MODBUS TCP
- ✓ Open Platform Communication
- ✓ Alarm & warning recovery, logs
- ✓ ONVIF device manager
- ✓ Video Management System
- ✓ 3rd party software integration

QUANTIFY GAS FROM A **SAFE DISTANCE**

# EyeCSite

Quantitative Measurement & Alert Software Solution for OGI Cameras

EyeCSite offers a wide range of functionalities that will detect, alert and quantify gas leaks for OPGAL's EyeCGas 2.0 , EyeCGas Mini and EyeCGas 24/7 Solutions. EyeCSite can detect and quantify all VOC's (including Methane, Benzene) in a very simplified and user friendly interface.

Combined with OPGAL's handheld cameras, it will rapidly increase the surveyors efficiency and allow them to safely reach areas from a variety of distances. With OPGAL's 24/7 fixed monitoring solutions, it also offers a wide range of functionalities that will detect the different anomalies that could take place in any scenario, any given time.

## Safe & Rugged

Suitable for harsh industrial environments. The handheld computer version is available both in a non-certified and certified laptop.

## Intelligent Thermography

Automatically locates the hottest and coldest points of the configured region.

## Multiple Cameras View

Monitor multiple cameras in one screen (for the 24/7 fixed solution), or synchronize multiple handheld devices.

## Pan & Tilt

EyeCGas Software enables adaptation of Pan & Tilts system allowing movement and focus in targeted areas.
